

It is Liberty Pumps policy to comply with applicable U.S. Export laws, rules, and regulations. Accordingly, we want to remind your company that Liberty Pumps products are subject to U.S. export laws, rules and regulations.

The right to export Liberty Pumps products and technology from the United States and re-export these products from one destination to another outside the United States is limited by the various regulations administered by the U.S. Department of Commerce, the U.S. Department of State and or the U.S. Treasury Department's Office of Foreign Assets Control. Information regarding these requirements is available via the Internet and may be found at the following websites:

Department of Commerce: <http://www.bis.doc.gov>

Department of State: <http://www.pmdtc.org>

Foreign Assets Control: <http://www.treas.gov/offices/enforcement/ofac/regulations>

Liberty Pumps products and technology may only be exported or re-exported in accordance with U.S. export control laws and an export license or exception may be required. Liberty Pumps products and technology may not be sold or transferred to any person or entity denied export privileges by the U.S. Government or to countries subject to a US embargo. Liberty Pumps products are classified by EAR 999.

Under no circumstances can Liberty Pumps products be shipped to the following countries: Cuba, Iran, North Sudan, Syria, Crimea - region of Ukraine, and North Korea.

For a listing of specific products that require licensing, please consult directly with the factory.

We also strongly recommend that our domestic representatives and distributors scrutinize purchase orders from any and all customers but especially engineering groups, trading houses, freight forwarders, and other known exporters. It is important to understand the end-use and end-user for all products you sell in order to avoid common pitfalls. Red flags which often identify sales for export include but are not limited to:

- Requests for certificates of origin
- Requests for shipments to freight forwarders
- Payments in cash
- Customers reluctant to identify end-use
- Export packaging
- Product does not fit customer's capabilities or line of business
- Routine installation, maintenance, or training is declined

All parties to the export transaction may be penalized in the event of a violation. Liberty Pumps strongly supports Export Compliance initiatives and hopes that you will do likewise.
